Manifesto for Parking

- On 22nd May we launched the **Manifesto for Parking**
- The Manifesto was sent to all members, stakeholders and election candidates, as well as selected media.
- This will form the basis of our **Blueprint for Parking** which we will launch at the President's Reception in July and set out the BPA's lobbying objectives for the next five years.

Manifesto for Parking

Parking is part of everyday life and it is essential that we create a positive parking experience for everyone in the UK.

At the heart of our Manifesto is a strong commitment to raise standards and deliver a professional and consistent service across the parking sector.

As the recognised authority in the parking sector the British Parking Association is driving change and we want commitment from the next government to act to ensure a smarter and more sustainable future for everyone.

Effective parking management keeps businesses and people moving. Without it, we all suffer. With proper investment, acceptance and adoption of new technology, we can create a more mobile society for now, and for the future.

Andrew Pester, Chief Executive, BPA

Parking is a service, it is provided to enable a mobile society. Everyday millions of people go about their lives precisely because parking services are provided and effectively managed. Parking professionals up and down the country are keeping our streets safe, free from obstruction caused by indiscriminately parked cars; improving road safety, keeping children safe when they come out of school, enabling servicing and deliveries to take place, and protecting spaces for residents or people with disabilities, on high streets, town centres on housing estates, business parks, shopping centres and leisure centres that would become congested and inaccessible if parking wasn't managed. Good regulations and sensible management can help revitalise the high street and support local residents, motorists, and businesses more widely.

We are calling on the next government to put parking at the forefront of their plans, focusing on the key areas outlined in our manifesto.

✓ Clarify parking laws to support and encourage investment and innovation in sustainable parking services;

✓ Promote the acceptance that parking needs to be managed for the benefit of all.

Manifesto for Parking

We are calling on the next government to put parking at the forefront of their plans, focusing on the key areas outlined in our manifesto.

- ✓ Clarify parking laws to support and encourage investment and innovation in sustainable parking services;
- ✓ Promote the acceptance that parking needs to be managed for the benefit of all;
- ✓ Regulate the private parking sector – through a single code of practice and single appeals service;
- ✓ Empower local authorities everywhere to better manage footway parking and moving traffic;
- ✓ Require all owners and operators to have a life care plan for their car parks;
- ✓ Mandate that parking facilities and services are accessible for everyone and used fairly by all;
- ✓ Regularly review all Penalty Charges and also require Local Authorities to produce Parking Annual Reports;
- ✓ Outlaw abuse and assault of parking professionals.

Positive Parking Agenda

- New initiative to explore ways to transform the management of on-street and off-street parking facilities
- Desire to change how the parking sector is perceived by the public, media and those in government
- Key issues - communication, standards, transparency and technology
- Closely coordinated with Parking 2020 group activities
- Working group led by LASIG members, supported by BPA staff with input from other stakeholders
