PART OF

Programme

09:30	Arrivals & refreshments	
10:00	Chair's welcome	Peter Lowe
	Welcome note from the BPA President	
10:15	Welsh government updates	Ian Bradfield, Welsh Government

10:30 Keynote Speaker - Shane Williams

Shane Williams is a former Welsh international rugby union player who had a long and decorated career on the pitch. Shane has been awarded an MBE for his services to sport and is best known for his hugely successful time playing on the wing with the Ospreys as well as the Wales national team.

He was so successful on the pitch that Shane is the record try scorer for Wales, and is third on the international list of leading rugby union test try scorers, as well as being

Wales' most capped winger. Other accolades include being selected as the IRB International player of the year in 2008. Shane has vast experience of presenting, co-commentating and summarising for TV and radio. His outstanding career achievements, his global playing success and his personable, lively character makes him a well-respected media personality and popular speaker.

11:20 Coffee/comfort break

11:35	Blue Badge enforcement <i>With the extension of the eligibility criteria, having an effective enforcement regime to tackle fraud and misuse will become increasingly important. Speakers in this session will discuss some of the highly successful work they have been conducting. The Welsh government will discuss the latest policy thinking around blue badge and their aims for improving blue badge enforcement across Wales.</i>	Derby council case study Steve Goodall, Portsmouth council Welsh government

12:30 - Lunch and networking

13:15	Marginal gains <i>Marginal gains are all about small, incremental improvements that cumulatively produce a significant improvement and change to the services we are trying to deliver. Team involvement and asking those who are at the coal face, doing the job on a day to day basis, who else is better placed to identify those 1% improvements in areas that are often overlooked by others? Staff ownership of ideas together with an empathy and understanding of customer needs mean that the identified marginal gains have the best opportunity of succeeding. Rob will outline how the Derby Parking Team push for those incremental improvements and challenge working practices to keep ideas fresh.</i>	Rob Shoebridge, Derby Council
14:00	Galileo Programme <i>Galileo is a joint national programme of work between the National Police Chiefs' Council and Highways England. Its overall objective is to achieve a safe, secure and efficient UK road network and aims to do this through innovative use of digital twin technologies to provide a richer intelligence product for all enforcement agencies charged with responsibility for policing the roads.</i> <i>This activity is closely aligned with another national programme of work that seeks to improve levels of vehicle and driver compliance. This work will reduce demand on enforcement agencies and enable enforcement activity to be focused on those most deserving of it.</i>	Representatives from the Galileo project board

14:30	Renewable energy and the role of parking and transport	David Hytch, Franklin Energy
15:00	Sharing experiences of enforcing moving traffic	Cardiff council and Andy Luck, London Councils
	<p><i>With councils in Wales having the ability to adopt powers for enforcing moving traffic, we will hear views from both Wales and London on the practicalities involved, including comparing notes on adjudication decisions.</i></p>	
	<p>Multi-tasking enforcement platforms</p> <p><i>Councils now have to deal with an increasing range contraventions committed by drivers. This session will discuss the background to the development of multi-tasking enforcement systems. It will also provide a review how the City of Bath, one of the UK's leading tourist destinations and a UNESCO World Heritage Site which draws over 3.3 million visitors and 70,000 vehicles every day, is using such multi-tasking technologies.</i></p>	Tim Daniels Videalert
16:00	Summary of the day and conference close	Peter Lowe
